

Interpretation of results

When calculating raw points, a [standard key template](~/Content/Cattell(girls)_eng.pdf) is used, which is superimposed on the questionnaire.

Each key match is worth 1 point. The form of interpretation for the options for boys and girls is absolutely identical. The resulting score is a preliminary "raw" assessment. Each preliminary assessment is translated into a "scale" - standard ("sten") by correlating with normative data" presented in the form of [tables](https://psylab.info/Методика_многофакторного_исследования_личности_Кэттелла/Детский_вариант#.D0.9F.D0.BE.D0.B4.D1.81.D1.87.D1.91.D1.82_.D1.81.D1.8B.D1.80.D1.8B.D1.85_.D0.B1.D0.B0.D0.BB.D0.BB.D0.BE.D0.B2), different for children of different sex and age.

Cattell test, children's version for girls (120 questions)

How old are you?
